

Bespoke solutions.

Quality service.

Connected.

We connect you with more than you thought possible.

In the world of fibre, being connected is vital. So it's good to know that you can now access all the products you need to build your fibre optic infrastructure, wherever you need them. Welcome to Fibre Associates.

The moment you're connected to Fibre Associates, you'll benefit from our unrivalled expertise and global reach.

Enabling you to profit from:

- Highly competitive component costs. We supply some of the worlds' largest fibre optic projects, allowing you to benefit from our economies of scale.
- Improved inventory management. Our large scale inventory and distribution capability allows you to manage your own stock levels efficiently and rely on effective delivery, anywhere.
- Service excellence. We can work in partnership with you to achieve bespoke solutions for your individual fibre requirements.
- Access to innovative new products and a dedicated research and development team.

Read on and discover the benefits of **being connected**.

Connected to Fibre Associates.

The beauty of connectivity? In business it's often not what you know but who you know.

We understand the importance of on-time delivery of the right components, anywhere in the world. That's why we pride ourselves on our approach to stock management and adapting to meet new needs at a rapid turnaround.

By connecting to our global procurement network you have everything you need to offer an end-to-end fibre solution. Our product specialists will ensure that you always purchase the right solution for your requirements, and as a flexible OEM, we can cater for any non standard requirements efficiently and cost-effectively.

Our portfolio of products and services can also support the widest range of applications and industry sectors. Whether you're an installer looking for rapid delivery of components, or a systems integrator in need of a new connectivity solution for data centre or telephony applications, Fibre Associates is the only connection you need.

Fibre Associates. Full circle service.

The choice really is yours. Whether you need a reliable source for key components or are looking for an expert partner to work collaboratively with you on new requirements, we offer the whole package. A level of service that's unique in the field of fibre.

Partner

As your fibre partner, we'll happily give you advice and work to develop further opportunities for you.

Innovator

We don't just offer a fixed range of off-the-shelf fibre optic based products. Thanks to our in-house development teams we produce innovative solutions of our own. That means that, if we can't source a product to meet your exact needs, then we'll try to design one.

Supplier

Fibre Associates are a leading designer and manufacturer of fibre optic connectivity products and structured cabling solutions.

Provider

Fibre Associates sources and provides the most sophisticated components for some of the world's largest fibre optic construction projects.

Whatever you need, from cables to customer premise equipment, from point of presence apparatus to automated trenching machines, we'll get you **connected**.

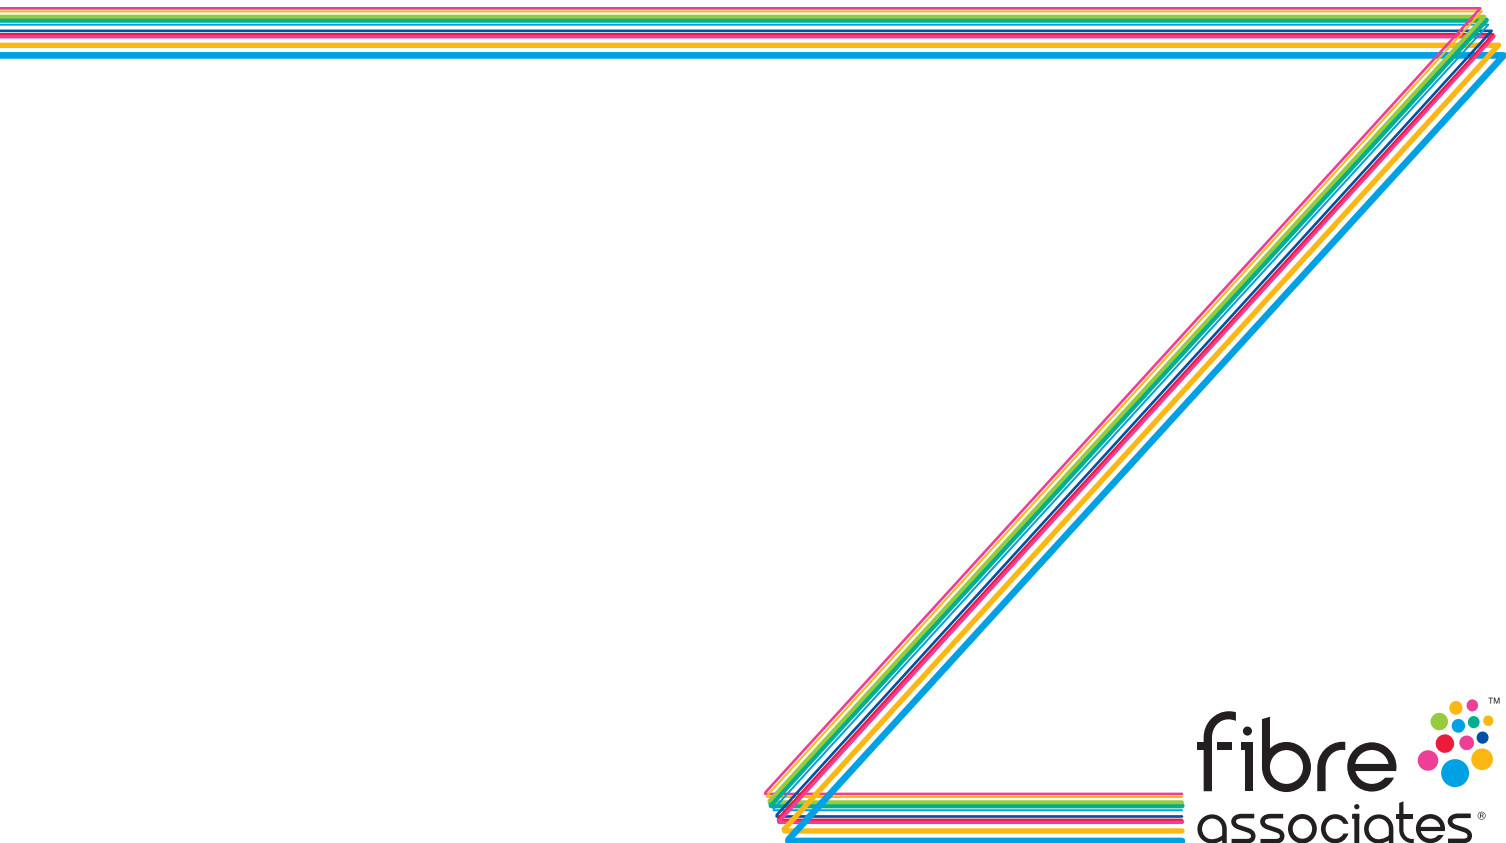

Fibre Associates has extensive knowledge and manufacturing experience in optical connectivity enabling us to offer our customers a unique service across a wide portfolio:

- **Fibre Optic Cable** – Meets IEC11801 standards for telecoms and datacoms environments. Available in bespoke lengths or full 2km or 4km reels.
- **Pre-Terminated Solutions** – High quality assured UK manufactured patch leads, for a full range of solutions including MPO and MTP.
- **Enclosures** – To meet every need from fully loaded patch panels to specific requirements. High volumes catered for.
- **High Bandwidth Datacentre Solutions** - In accordance with TIA-942 standard. Space saving scalable design for cost effective enterprise solutions.
- **Passive Point of Presence Equipment** – Complete equipment range from Optical Distribution Frames to Head End Splitters.
- **Active Customer Premise Equipment** – Wide range of solutions from Media Convertors to Fibre Optic Transceiver Modules.
- **Test and Inspection Equipment** - Hand-held state of the art optical network testing and maintenance equipment.
- **Fibre To The Home** – Full product range for any FTTH project around the globe.
- **Outside Plant** – Provision of construction and fibre installation equipment.
- **Bespoke Branding Options Available**

It's time we got **connected**.
